L.B.J. Sent Best Wishes to Grads

One honorary degree and approximately 150 Bachelor of Science degrees were conferred at commencement ceremonies at Tri-State College on Saturday, June 3.

The commencement speaker, Dr. John J. McKetta, Jr., Dean of the College of Engineering, The University of Texas, alumnus, and member of the Board of Trustees of Tri-State College, was awarded the honorary degree, Doctor of Engineering.

Mr. John C. Humphries, Assistant Chairman of Mechanical Engineering, awards a diploma to a Tri-State grad.

Dr. Richard M. Bateman, President, Tri-State College

Tri-State College Administrative Officers

Dr. Leslie A. Willig, Executive Vice-President

In 1884, Tri-State College was founded in Angola, Indiana as a normal school for teachers. Over the years it has undergone a complete transition and is now an engineering and business administration college with an enrollment of nearly 2,000.

1968 was an especially challenging and rewarding year for the administrative staff of Tri-State College. Its normal duties included regulating housing, counseling students both in academic and professional areas, handling admissions, compiling and maintaining academic records, computing various necessary statistics, promoting good public relations and advising numerous student organizations. Also, funds were secured and plans were completed for extensive building projects. Some of these structures were completed and put into use this year.

Due to their efforts the fine academic reputation of Tri-State College was not only maintained but greatly enhanced, making the road even smoother for graduating students.

College aid to students did not end with graduation. An excellent placement staff served graduates in numerous invaluable ways.

John W. McClellan, Assistant to the President

Dr. William L. Scott, Dean of Students

J. B. Swihart, Assistant Registrar and Admissions Counselor

Dr. J. Glenn Radcliffe, Registrar and Director of Admissions

Dr. Fredrick J. Bogardus, Dean of Faculties

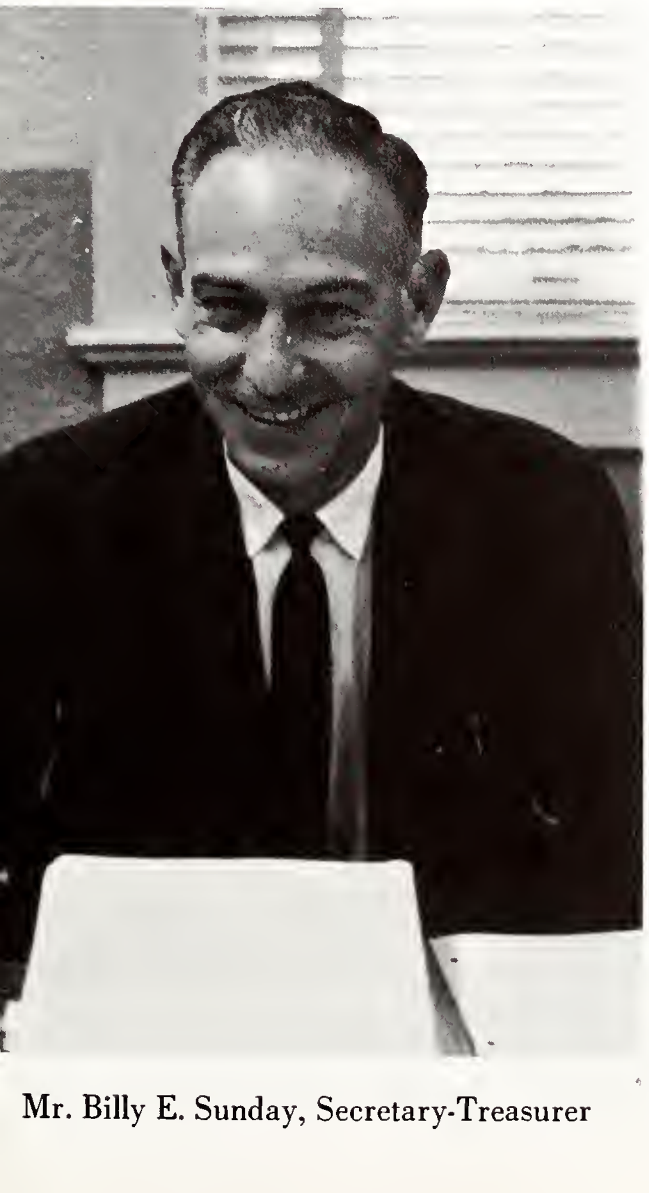
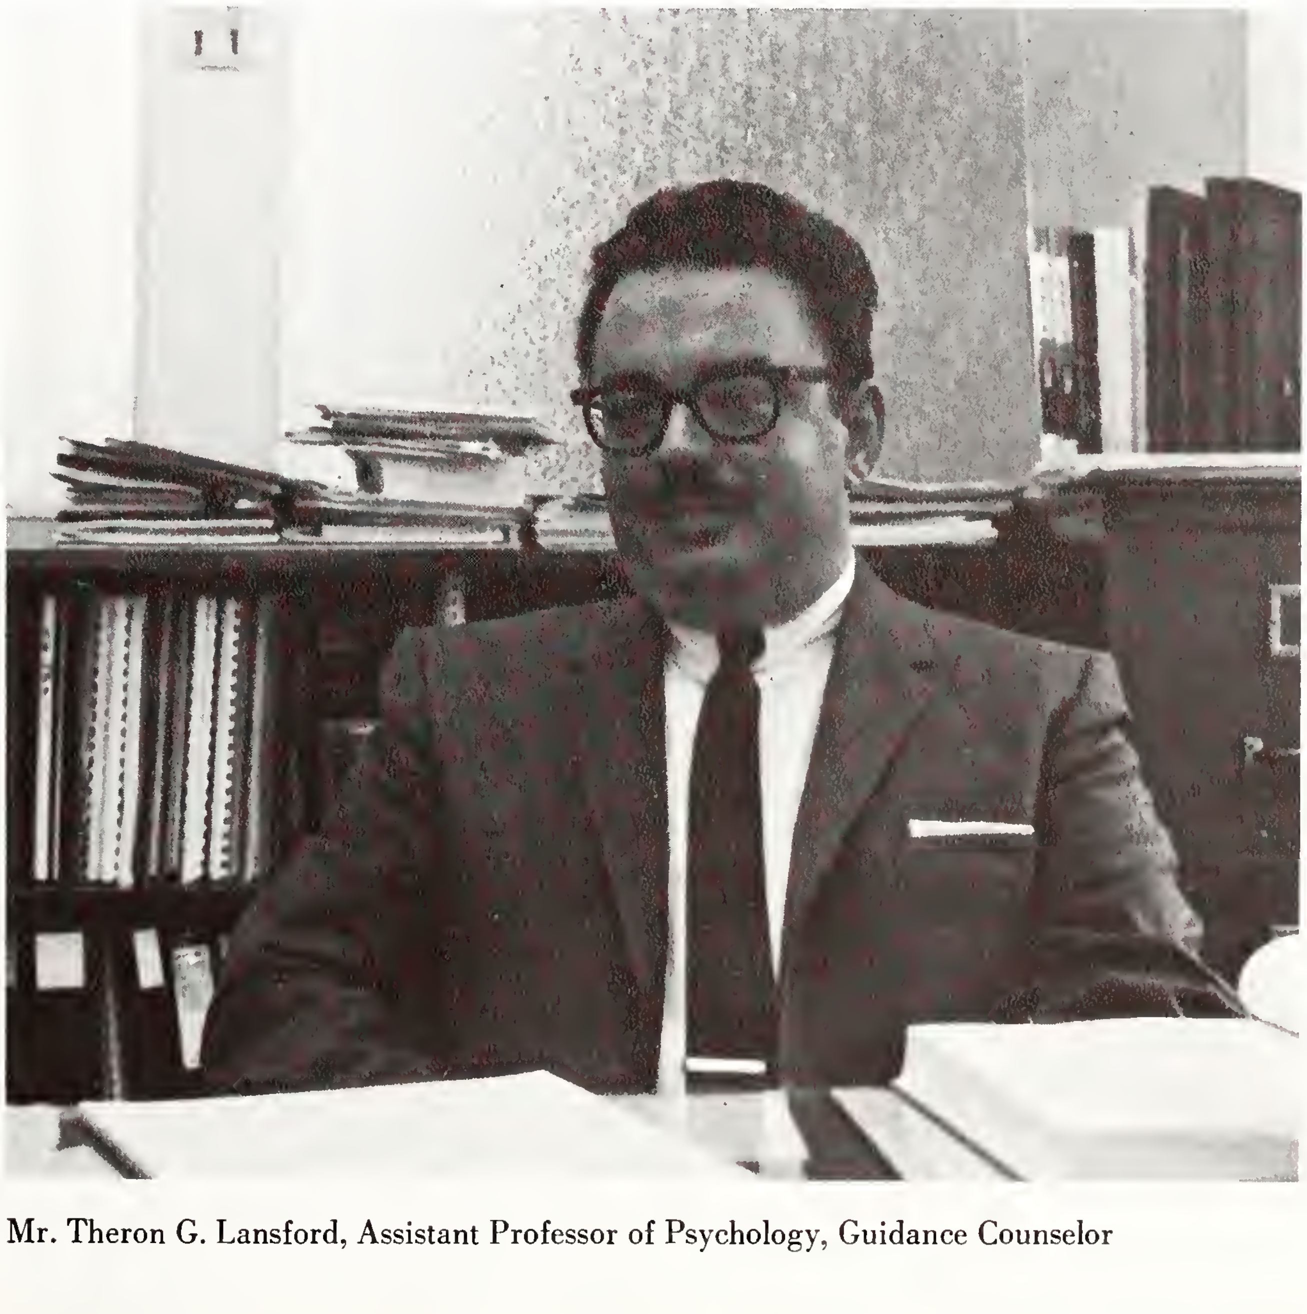
Mr. Robert Ramsey, Director of Alumni Affairs



Mr. Billy E. Sunday, Secretary-Treasurer



Mr. Theron G. Lansford, Assistant Professor of Psychology, Guidance Counselor

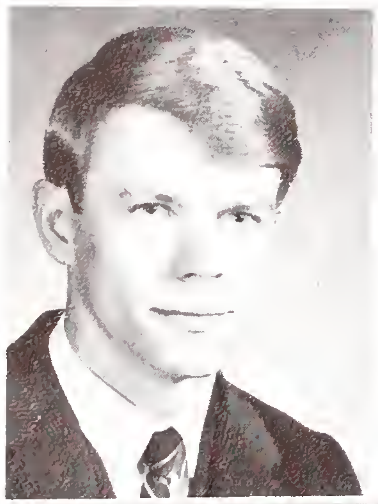
Aeronautical Engineering

QUINTIN J. HAWTHORNE, Chairman; B.S., Tri-State College; M.S., Ph.D., University of Notre Dame; P.E. Indiana.

The Aeronautical Engineering Department is keeping pace with the rapidly expanding field of space technology. For being the most recently added department of engineering at Tri-state, the Aeronautical department was certainly not toddling in its infancy.

In its laboratories this is clearly seen. The acquisition of new equipment, the most recent of which is a supersonic wind tunnel, and the expansion of interests into new fields of endeavors, make the Aero Dept. one of the most progressive on campus.

Aero Seniors



HARLEY J. DODGE, Chalmers, Indiana; AIAA, Thunderbirds.

Faculty

Business Administration

The business world, 1968, looks for a college education in its members. The master of one skill or subject, the specialist, can not alone bring about progressive civilization and culture. Man as a social being must have a broad vision and wide experience. He must have a familiarity with many different fields of thought and interest.

This rounded culture was what the School of Business Administration strived to obtain. The Departments of General Business Administration, Motor Transportation Administration, and Accounting, all combined to offer a select, yet deversified combination of courses. The students could major in any of these departments and select several electives from the other business departments as well as from the rest of the school.

During the past year, the Chemical Engineering Department of Tri-State College, headed by Dr. Kenneth H. Slagle, expanded in both course offerings and facilities. The John G. Best Hall of Science was the departments new home. Extensive laboratories and classrooms are provided, as well as two large lecture theaters.

The course of study was built upon a foundation in mathematics and basic science, including a concentration in chemistry, and the communication aids of engineering graphics and English, both written and spoken.

Chemical Engineering

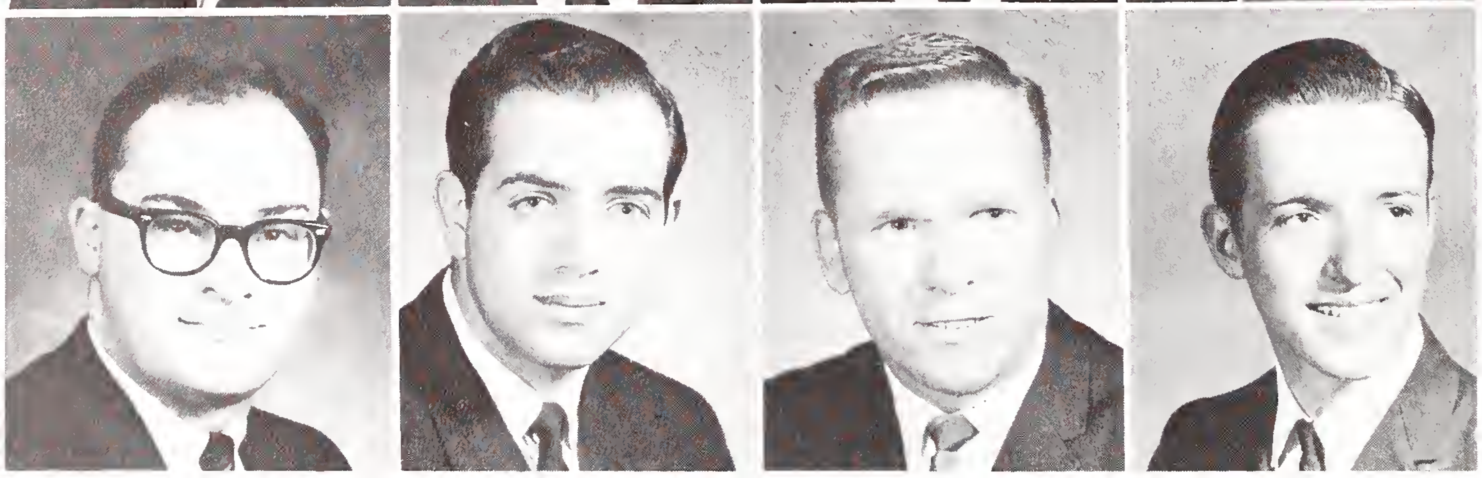
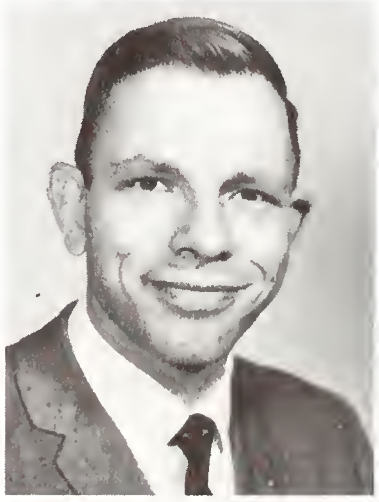
DAVID L. PARSELS, Liberty Center, Ohio; Pres. Chemical Society; Tau Sigma Eta; Dorm Standards Comm.; Student Senate; Student Director.



Civil Engineering

Increased requirements in civil engineering made it a diversified field. To give the students the fundamental principles underlying the divisions of civil engineering and a certain degree of skill in applying them, Dr. George Hauck and his staff taught a diversity of courses. To keep abreast of the problem of water and air pollution and water supply, a course in sanitary engineering covered water supply and treatment and sewage systems.

Work in urban planning and transportation engineering was taught to meet the demands of urban renewal programs and the complexity of water, land and air travel problems with an eye on space travel. Soil mechanics and its applications, the design of foundations for structures, and the analysis of earthwork, and the investigation of subgrades for highways, railroads and airports was thoroughly covered.



DR. GEORGE F. HAUCK, Chairman; B.S., Architectural Engineering; M.A., Architectural Engineering, Oklahoma State University; Ph.D., Northwestern University; P.E., Oklahoma.

English and Humanities

There are two important objectives the department strives to meet. First, concern for the individual student and his progress in communication skills. Consequently, tests are administered to him during orientation, which evaluates his needs, and provides results used to assign him to courses which are of the greatest value to the student.

A second important objective is to provide an opportunity for the student to discover personal interests which he finds enjoyable in future years. To provide this, courses in classical and modern literature, foreign language, and music appreciation are offered.

To acquaint him with the mechanics of advanced writing skills, a course called advanced composition was introduced. Compositions varied from creative writing to business or technical reporting, depending upon the objectives of the individual.

Humanities I and II are the study of selected ideas which have significance for 20th Century Americans as those ideas that were expressed in literature and the arts of the 19th and 20th Centuries.

Mathematics and Engineering Mechanics Department

Tri-State's Math Department, which was the largest of the sevice departments, aided in services to more than 1500 students each day.

The Math Department, headed by Dr. Ralph W. Young, gave students the complete courses in mathematics that were needed for every aspect of Business and Engineering at Tri-State. Introduction to Digital Computer Programming, a year old course, was offered by the Department during the 1967-1968 school year.

The Math Department held one seminar each quarter to keep the instructors better informed and orientated.

Mechanical Engineering

DR. QUINTIN J. HAWTHORNE, Chairman; B.S., Tri-State College; M.S., Ph.D., University of Notre Dame.

The major in Mechanical Engineering is intended to give the student a thorough training in fundamental principles. The courses are arranged and graded so as to enable the student to become thoroughly conversant with the principles of contemporary engineering practice, and by persistent association of abstract analysis with practical problems to prepare him for a successful professional career.

There was hardly any field of industry in which mechanical engineering problems were not met. The problems of industry had their origin in the design and manufacturing of equipment as well as the choice of operation of equipment.

Mechanical engineering implies the use of mechanical systems of mechanisms; thus, courses in mechanisms, strength of material, metallurgy, dynamics of machinery, and mechanics are given.

In addition there is time to study a sequence of courses in the humanities area and to give more communication studies, written and spoken. These are all important, for engineers' work has the creation of things for humanity. His work is an art and a science, and he has to communicate fluently. He has to know the past in order to better serve in the future.

Institute of Drafting and Design

Drafting and Design at Tri-State is devoted to both training draftsmen and teaching engineers to decipher drawings. The department stresses that engineers must be able to use the drawings of the industrial world and understand the draftsman's language. It also offers courses that assures the prospective draftsman a complete education for his field of work.

Use of drawing equipment and standard layout is stressed first. Then, after the student becomes familiar with his tools he is taught the principles of orthographic projection, auxiliary views, isometric and cabinet pictorial drawings, and dimensioning and lettering. Those who enroll in Drafting and Design are given a more complete training in all the techniques enjoyed in the drawing world.

Features

Married students are no different than their single cohorts on campus. They attend classes, worry about finals, attend ball games, and are active in student activities just as the single student, and are seen patronizing Don & Herb's every so often. But the married student has a deeper responsibility to his wife and children. He also worries about his son's broken tricycle, the baby's formula, and putting his tired children to bed and kissing them goodnight. He has greater responsibilities, but also greater joy.

A strong foundation of love and responsibility is firmly established by the married students living their first years together through the worries and hardships of attending college. Married students living either in barracks, trailers, or cottages are provided with many unique opportunities and lasting memories. No matter where the married students live, barracks, trailers, or cottages, their home is their castle and often their most challenging abode. It must be made to accomodate many necessities. Studies are primary, in conjunction with married responsibilities, and each must be provided for in order to insure a most profitable and happy future.

Married Student Housing at Tri-State

"First Home" for Married Students at Tri-Stan

A kiss to send him on his way

Tri-Stan housing is owned and maintained by Tri-State College. Tri-Stan housing is known to all as the "barracks." It is a good place to start married life when so many expenses are so pressing . . . like college fees for the husband. Like college, the barracks help develop one's ability to cope with life situations. Nothing is more involving than literally rebuilding and remodeling your very own home. Or shall we say that which you would like to call home? What a marvelous opportunity for an ingenious, determined young wife to utilize her unborn interior decorating skills. Their main concern is to make a warm, attractive palace for her Lochinvar. But the trick comes when she realizes what the structure was originally designed for—army barracks. The opportunities thus are endless and infinite. Virtually anything can be done to the barracks apartment in an attempt to fill their needs and wants. Young couples learn a great deal about construction this way. It's the best way to become a truly profficient "do-it-yourself-er". Mistakes are made, of course, but how wonderful to leave one day, going to a real house or apartment and having the knowledge of your previous mistakes. And no real harm was done to the barracks, just experimentation. Tri-Stan lends itself to this so well and uncomplainingly! Most conventional housing wouldn't.

Tri-Stan is unique. It offers shelter, adequately and inexpensively, and serves as a limitless blackboard for eager ideas and innovations.

When his wife is away, Mark Mueller becomes student and baby-sitter.

Mark and Sue Mueller happily share housework together.

Left—Sue Mueller borrows the cookie cutter from Kate Maruszak while exchanging some of the local gossip.

The old abandoned barracks, no longer livable, were used by the Angola Fire Dept. for fire-fighting practice.

Ken Knipp and his wife were enjoying an outdoor bar-b-que when all of a sudden the grease from the hamburger caught fire and slightly overcooked the hamburgers. Better luck next time, Ken!

BRIQUETS
2040

Repairing the porch door on a cold day sure isn't any fun for Mark Mueller

Someday when I'm big, I'll go to Tri-State like my daddy

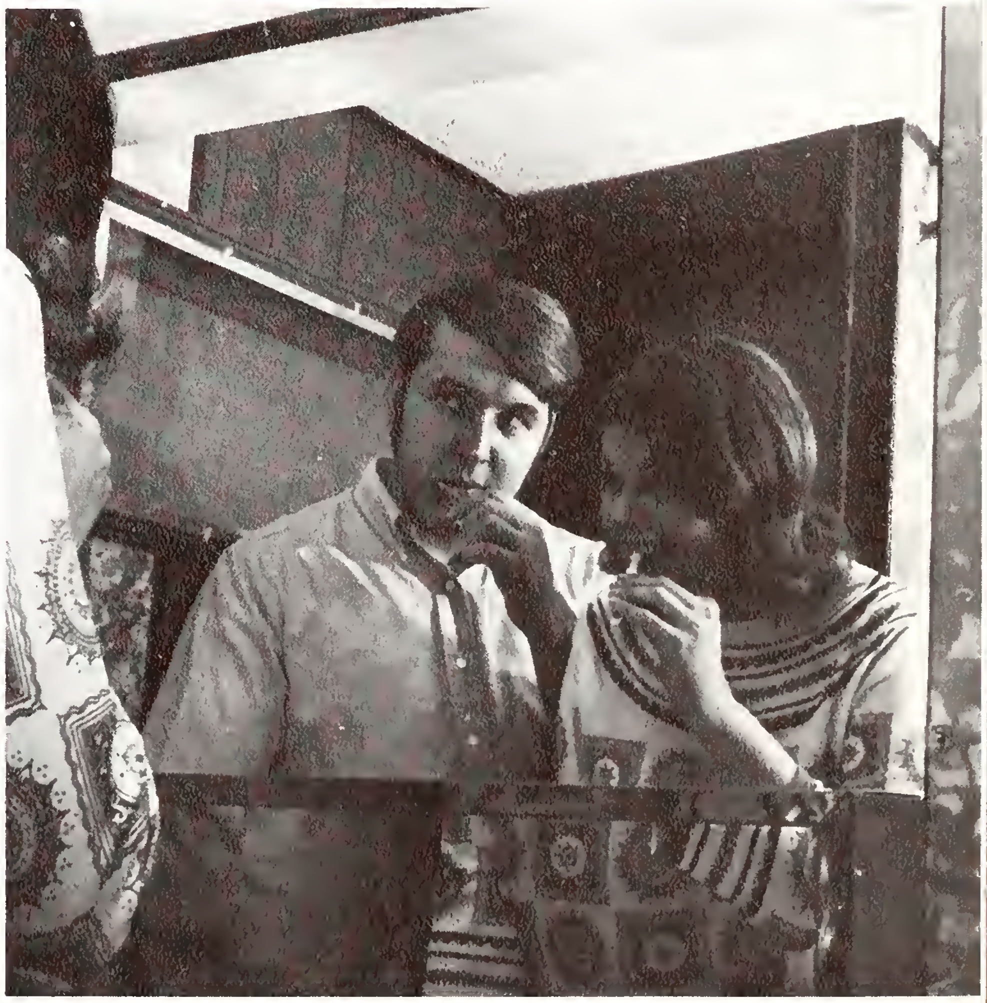
The day every student dreams of,—graduation day.

Herb Masiuk asks his wife, Glenda, "How soon before dinner?"

Married Life in the Trailers "Crowded but Cozy"

Some married students found it convenient living at the various trailer parks in Angola. After finishing classes or after work, home is a wonderful place to return to, and the company of the other married students makes the rather crowded condition a little more enjoyable. Trailers offer a very concise, but also a very inexpensive manner of living. Efficiency gets to be a good habit, after all, there isn't much space to litter with misplaced articles. "A place for everything . . ." is their motto. These students have an added advantage of never wanting for a home. If they choose, after graduation, they're sure of a good place to be, because they brought it with them.

Almost as efficient as a drive-in post office



A healthy smile is a happy smile

Ooowie, that smarts!

Just a few of the cottages which married students rent.

Some of the more romantically inclined married students moved to cottages that surround the many lakes of the area. To many it is a continuation of their honeymoon. There are all kinds of activities available to the cottage dwellers. In the summer and spring there is fishing, boating, swimming, and skiing. A big temptation to one studying for a test. The winter time activities include riding snowmobiles, icefishing, skiing, ice skating, and tobagganing.

Although in the winter many of the cottage dwellers wished that they were closer to school. Many a student living on the lakes has missed his morning classes during the winter while dragging his car out of the snow.

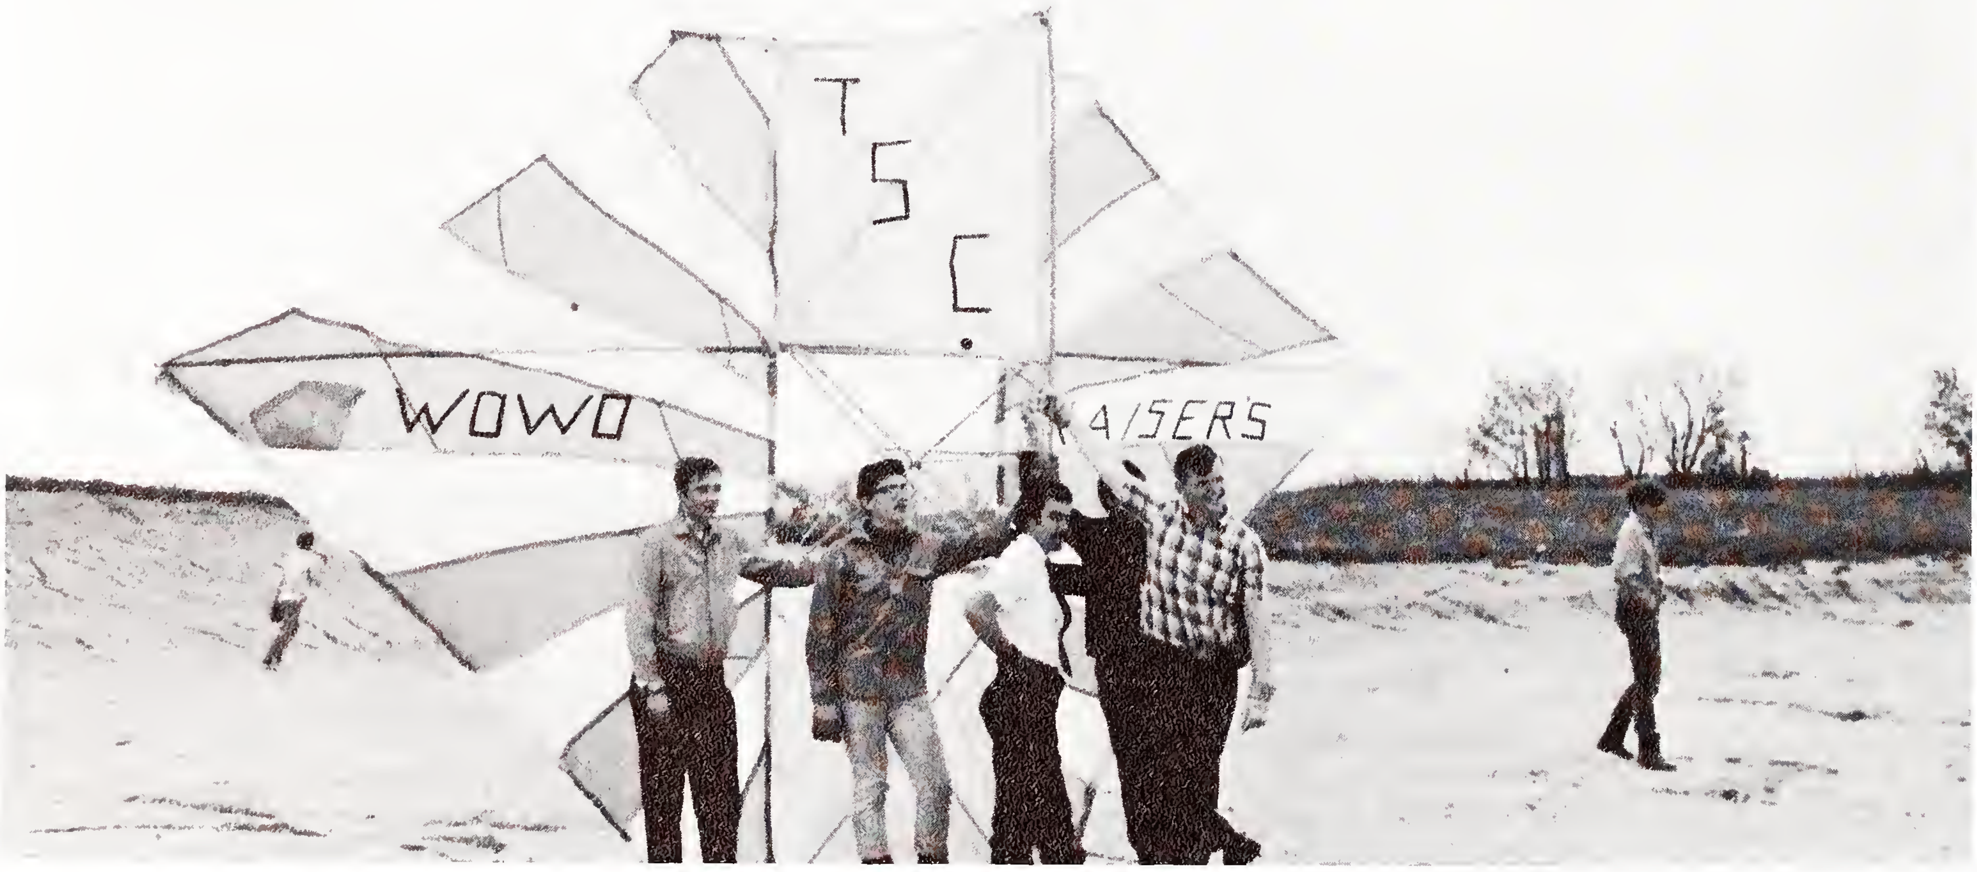
After studying, Steve and Marge Neal relax with their pets.

Off to school while Marge Neal starts the house work.

Cottage Life Provides Continued "Honeymoon"

A serenade while studying makes concentration a little easier.

World's Largest Kite Flown at Tri-State



The builders prior to flight

A prism-and-wings creation built from rug poles and parachutes by four Tri-State students was sent aloft May 5 in a bid for recognition as the world's largest manually launched kite.

The big bird, 12 feet high and 20 feet wide, is a French war kite pattern, modified to increase the surface area. Its 216 square feet beats the previous record of 144 square feet. The huge kite soared to the limit of their 1500-foot cable—made up of parachute shrouds and quarter-inch clothes line.

It was designed by Mark Russ of Kenmore, New York. Helping him build it were Bob Thompson, Tarentum, Pennsylvania; Ray Garr, Bethel Park, Pennsylvania; and Dave Horne, Cleveland Heights, Ohio.

It's going down!!

Happiness is a high-flying kite

Ambassadors of Music

Alpha Beta Alpha

Alpha Beta Alpha, the honorary business society, was founded in September, 1938, to recognize outstanding scholastic achievement of students in the School of Business Administration. A student is required to maintain an average grade of B or better for the six quarters immediately preceding his election to membership. The high ideals set by Alpha Beta Alpha serve as a goal for all students in the School of Business Administration.

Nigro and Jenner Receive Journalism Award

Alpha Phi Gamma—L-R, Front Row: Mr. Mike Nyikos, Peter Francies, Dave Price, John Nigro, Jack Harreld, Jim Scotti, Jim Cooper, Mr. Ronald Gilbert, Al Yoder. Back Row: Donald Jenner, Joe Persang, Randy Webber, John Sedlacek, Bob Gleason, Bob Graber, Donald Locke.

Alpha Phi Gamma, honorary journalism fraternity, is dedicated to recognition of individual ability and achievement in journalistic pursuits; service to and promotion of the college welfare through journalism; establishment of cordial relationships between students and members of the profession; and the unity of congenial students interested in journalism.

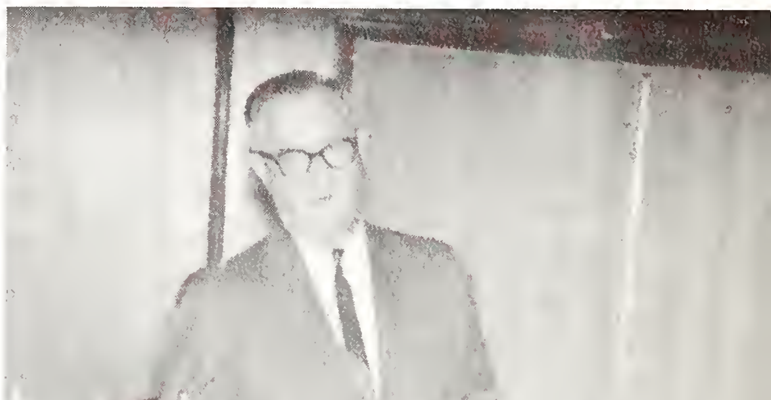
At TSC Gamma Phi chapter strives to recognize those students who have contributed to the student publications program, and promote a positive understanding of endeavors throughout the campus community.

Gamma Phi Chapter sponsored the annual publications staff dinner this year which was highlighted by the presentation of the award for the outstanding journalist. President Bateman made the presentation to John Nigro, Editor of the Triangle, and to Donald Jenner, Editor of the Modulus.

APG also sold this year's Modulus to the student body during registration. The members also wrote articles for the Triangle and advised up and coming journalists on how to improve on their news writing.

Ronald Gilbert spoke to APG on policy change of newspapers

Dr. Richard M. Bateman presents the Richard Bateman Journalism Award to John Nigro and Don Jenner.



Dr. Bateman spoke on the outstanding job student publications is doing.

Tau Sigma Eta

Tau Sigma Eta, honorary engineering society, was incorporated in April, 1930, under the laws of the state of Indiana. Election into the society is the highest honor an engineering student can attain.

Requirements for admission into the society are four quarters of college work with a minimum of seventeen hours work during each of the four quarters and a scholastic average of at least 3.1 out of a possible 4.0. A grade of D or lower disqualifies a student for membership. Members of the society are required to maintain an average of 3.0 to be considered active.

Tau Sigma Eta encourages brotherhood and good fellowship, a well-balanced social program, and the maintenance of high scholastic records.

A banquet is held each quarter as a climax to the quarter's activities and aid in encouraging and fostering the ideals of the society.

Sigma Chi Epsilon

Sigma Chi Epsilon was founded in 1967 under the leadership of Dr. George F. Hauck, to recognize outstanding academic and leadership qualities of civil engineering students. Prerequisites for admission are a 2.5 average and an interest in extra-curricular activities.

Student Directors Assist Students

Handling most of the campus activities for the administration and students fell on the shoulders of the student directors. This honorary organization, founded to act as a service to the College, is comprised of students from many campus organizations. Selection of members is based on leadership, scholarship, dependability, cooperation, and desire to promote the welfare of the College.

The majority of students attended the many activities on campus giving little thought to how efficiently these activities were handled by the student directors. These men coud be found at the start of each quarter directing the bewildered freshmen about campus. In addition to orientation, much of the registration procedure was done by the student directors. At baccalaureate and graduation ceremonies the student directors were seen escorting parents and guests to their seats and guiding them about the campus.

Greeks

EDITOR'S NOTE—The Fraternity Section of most college yearbooks, including the past editions of the Modulus, is of little interest to anyone other than the Greeks themselves and their alumni. There is nothing seriously wrong with this concept, other than the fact that the entire yearbook should consider all the segments of the campus.

The staff of the '68 Modulus has approached the Fraternity section differently. We have used statements from the pledge manuals of each house to express their backgrounds and basic precepts. There is hardly room in this area to discuss the fraternal system and the application of brotherly love. Yet, anyone associated with Tri-State, be he student or instructor; enrolled or graduated; independent or Greek; he will find the tenets that guide the modern fraternity both interesting and informative.

Acacia

Fraternity

Acacia

I am an American. I hold a trust for all good Acacians—those who were Acacians before me, these who are now, and those who will become Acacians in the future. In the Acacia spirit, I charge myself with responsibilities; to better my fraternity's record, I am an Acacian wherever I may happen to be. I gladly contribute my honest share of effort and wish to serve Acacia to the best of my ability. I will always think of Acacia as one of the best fraternities; its rich heritage of principles having been fostered so that I might enjoy a fine fraternal opportunity. I am an Acacian. I am proud of it.

Acacia aims to assist those who are striving for a better and more useful existence in the world, while working for wisdom and understanding above all else. The Acacia Fraternity was conceived in the fall of 1903 at the Library of the University of Michigan. Our goal is to help the individual in two common endeavors—the developing of the mind and the growth in right conduct and character.

Our Purpose

To foster education, to maintain charity, to promote patriotism
To encourage culture, to encourage high scholarship
To assist in the building of character, to promote college loyalties
To perpetuate friendships, to cement social ties within its membership
And to foster the maintenance of college hymns by chapters for their undergraduate members

Alpha Sigma Phi Fraternity was founded on December 6, 1845, at Yale University. The open motto of the Fraternity is "Causa Latet Vis Est Notissima—The Cause is Hidden, the Results are Well Known". The purposes of Alpha Sigma Phi may be summarized in one phrase—To Better the Man.

Above—Professor Wayne A. Champion, Brother of Beta Omicron Chapter of Alpha Sigma Phi, became the second member of this chapter to receive the Delta Xi Award, the highest individual award granted by the Grand Council of Alpha Sigma Phi. Standing next to him to help him receive this distinguished award is his wife.

Delta Chi

" . . . believing that great advantages are to be derived from a brotherhood of college and university men, appreciating that close association may promote friendship, develop character, advance justice, and assist in the acquisition of a sound education . . ." Preamble to the Delta Chi Constitution

The founders of Delta Chi Fraternity were motivated by an urge as old as life itself—the desire for association with their fellow men. With this objective in their minds, they formed the Fraternity at Cornell University on October 13, 1890. Delta Chi has taken a definite lead in promoting the four most important features of worthwhile fraternity life: development of the individual, cooperation with the school administration, sound finances and excellent scholarship.

Tri-State College

The object of the Sigma Phi Delta Fraternity shall be to promote the advancement of the engineering profession; to foster the advancement of engineering education; to instill a greater spirit of cooperation among engineering students and organizations; to inculcate in its members the highest ideals of Christian manhood, good citizenship, obedience to law, and brotherhood; and to encourage excellence in scholarship.

Sigma Phi Delta traces its origins to the fall of 1923 at the University of Southern California. The Code of Ethics of Sigma Phi Delta is founded upon the basic principles of truth and honesty. A brother of the Fraternity should live so that his actions shall never besmirch his own honor, and thus maintain the honor of the engineering profession.

Sigma Phi Epsilon Earns Charter

We believe in the American college fraternity. We believe in Sigma Phi Epsilon. We believe in this fraternity because it would have us strive in every way to live up to the high principles for which it stands. These are Virtue, Diligence, and Brotherly Love.

Richmond College, Richmond, Virginia, cradled the beginnings of Sigma Phi Epsilon in the fall of 1901. The universal traditions by which mankind has attained the ennobling virtues deserve the fraternity man's study. These traditions are designated as:

The Tradition of Brotherhood
The Tradition of the Creator
The Tradition of Freedom
The Tradition of the Human Body
The Tradition of the Earth
The Tradition of Accomplishment

Kappa Sigma

The Star and Crescent shall not be worn by every man, but only by him who is worthy to wear it. He must be a gentleman . . . a man of honor and courage . . . a man of zeal, yet humble . . . an intelligent man . . . a man of truth . . . one who tempers action with wisdom and, above all else, one who walks in the light of God.

Kappa Sigma Fraternity was founded in 1869 at the University of Virginia, situated at Charlottesville. The founders of Kappa Sigma held high the belief that "the object of this Fraternity is to enjoy and increase the pleasures which are only to be obtained by the intercourse of congenial spirits."

Phi Kappa Theta

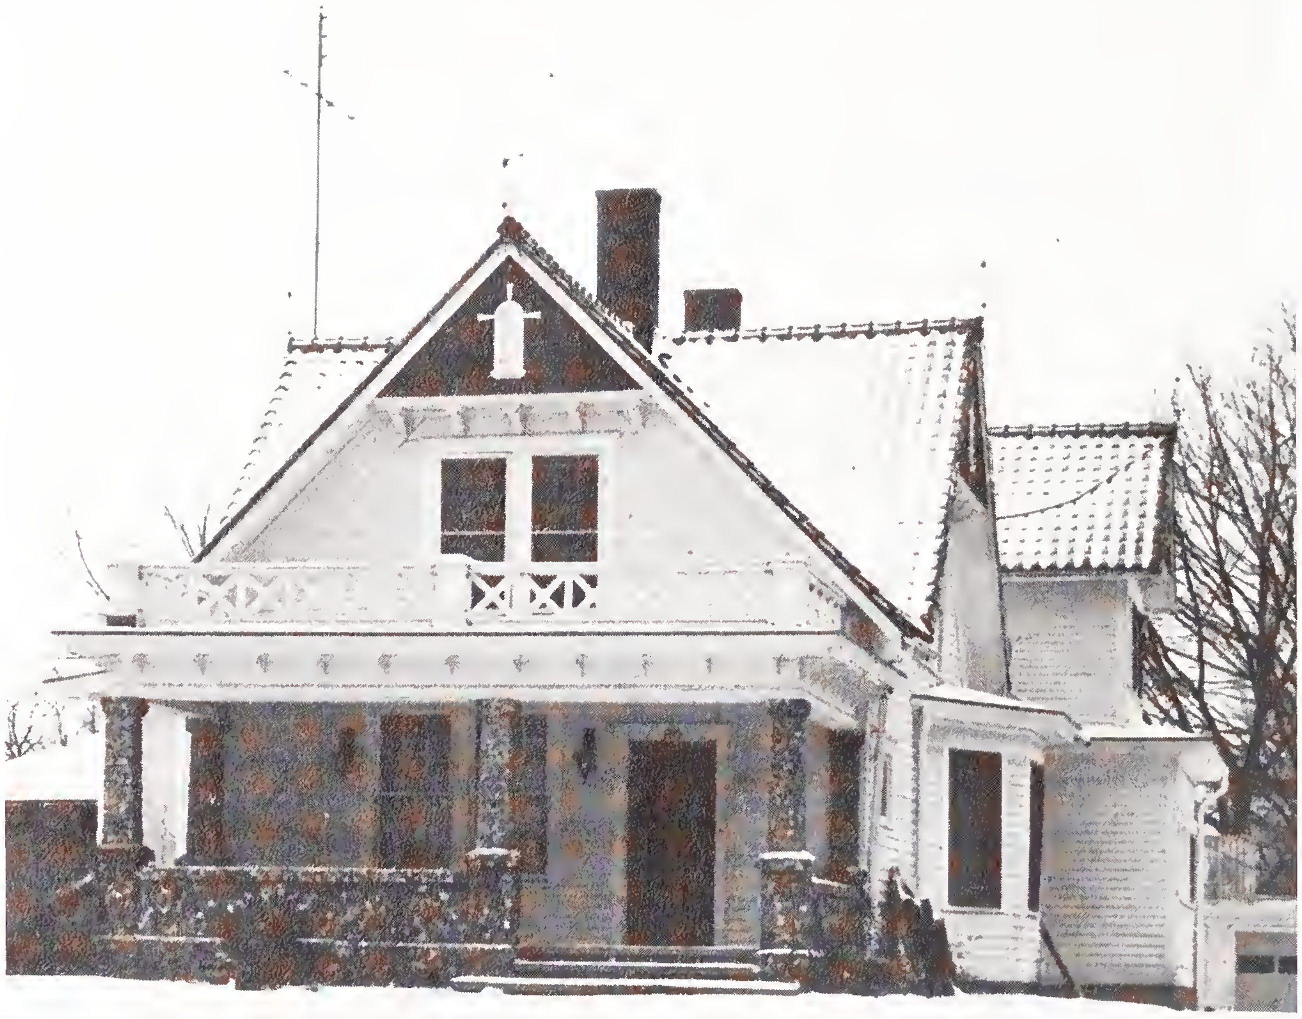
DOXOLOGY

Father all glorious, thou who
bestowest
All that they children can desire or
ask
Give us the gifts, for which our
needs thou knowest
Blessings of health and strength
for every task.
Phi Kappa Theta, noble and strong,
To thee with loyal hearts we raise
our song
Swelling to Heaven loud, thy
praises we ring
Phi Kappa Theta of thee we sing.

Phi Kappa Theta had its beginnings at Hope College of Brown University in September, 1889. The members of Phi Kappa Theta Fraternity have sought to be better than others, to be the best men on the campuses where they find themselves. That aspiration is wholesome; with God's grace, it becomes holy. It guarantees the moral strength of democracy, precisely because it is an affirmation of spiritual aristocracy.



Below—Mike Farrell and Tom Carlson are wiped out after the Bed Race.

AH!!! FOOD!

Tau Kappa Epsilon

We, the members of Tau Kappa Epsilon, believe that a fraternity should be a brotherhood in conduct, as well as in name. "Faith without works is dead." It is our belief that the essential elements of true brotherhood are love, charity and esteem. By the tenor of our daily action, we should evidence our devotion to the principles we have solemnly obligated ourselves to observe.

The organization of Tau Kappa Epsilon was begun in Bloomington, Illinois, on January 10, 1899. The Fraternity grew from a society whose avowed purpose was "to aid college men in mental, moral and social development." Now the nation's largest social fraternity, TEKE continues in the spirit of genuine democracy which challenges the Fraternity to choose men not for their wealth, rank, or honor, but for their personal worth and character.

The Platt Hall Fellowship enjoyed a very successful year. The men teamed up with Alwood Hall and constructed a float that won first place. We participated in intra-mural football, basketball, and softball, ending with a good record. In the fall quarter, the Hall presented a dance for the enjoyment members of the Hall. The Winter Carnival was held on a sunny day. Although there was no snow for the sculpture, we did have an open house for the parents and friends that were able to make the occasion. The closing activity of the Spring quarter was a picnic held at Pokagan State Park. Softball and other events were enjoyed by the Fellowship.

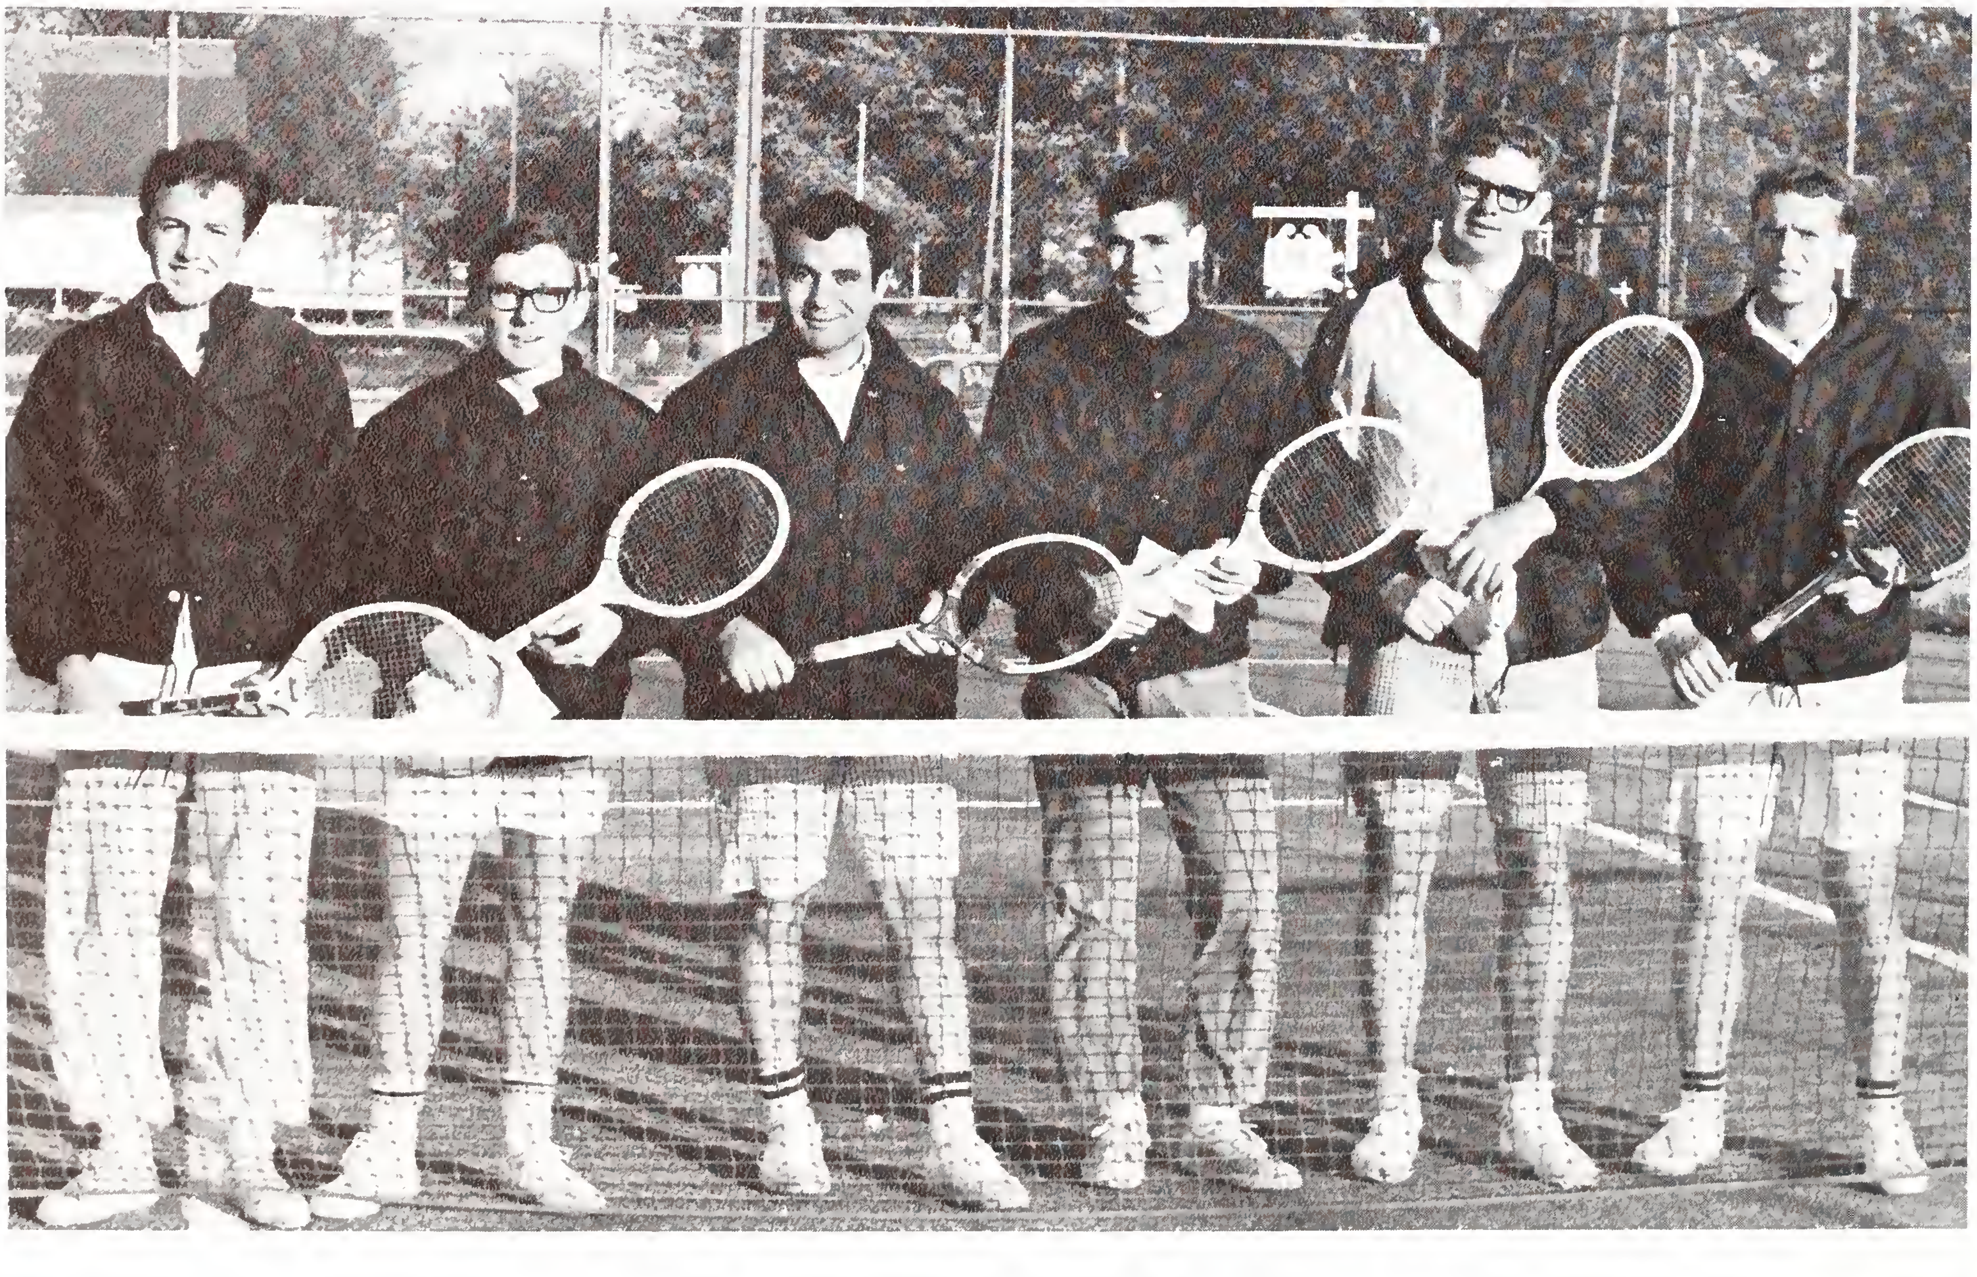
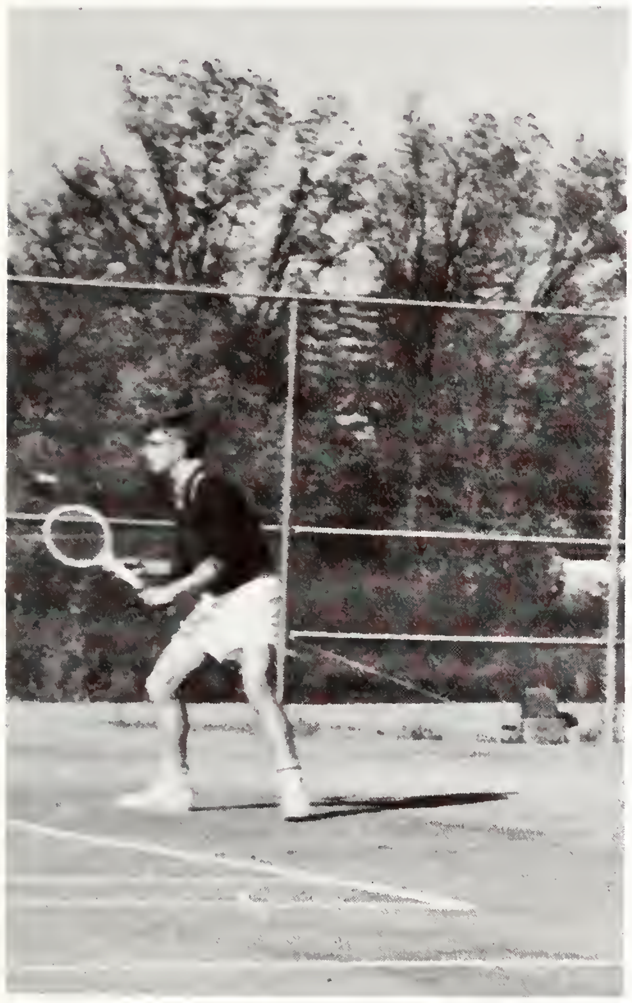
Borekci follows up on his serve to hit a return ball.



1968 Tennis Team—L-R: Bob Wagner, Jim Hauer, Ahmet Borekci, Paul Weisse, Dennis Black, and Harry Sinden.

Dennis Black Led Team to Perfect Season



B. J. "Doc" Mummert came out of retirement to coach the tennis team to a perfect 11-0 record and the Mid-Central Conference Championship.

Dennis Black led the team with a perfect season of 11 wins. He finished his college career with a 27-2 record. He was undefeated in 1966 and again in 1967 play.

Paul Wiese compiled a 9-2 record in the number one spot and finished his career with a 24-4 collegiate record.

The number three, four, and five spots were shared by five men in 1967. Harry Sinden ran up a 6-3 record; Ahmet Borecki was 5-1; and Dave Hoops was 3-0. Freshmen Jim Hauer and Bob Wagner broke into competition with 9-1 and 5-1 records respectively.

Wiese and Black combined for a 9-2 doubles record, while Hauer combined with Hoops, Sinden, Borecki, and Wagner at different times for a 10-1 record.

The only competition outside the conference saw the net men shut out Spring Arbor College 8-0. Conference foes Indiana Tech and St. Francis were shut out both at home and away, as the Trojans collected 68 points giving up only 11 to their opponents.

Soccer Team Wins on Home Ground

The soccer team hampered by unseasonal weather failed to come up with a winning season. Herb Stoerr, playing his second season as player coach, shared scoring honors with freshman John LaDuc, as each tallied four goals. Ahmet Borecki finished the season with three goals.

The home crowd was provided with five exciting matches. The opener saw the Trojans drop a 2-3 decision to Defiance on a last second goal by the winners.

The next two home meets were with conference foes St. Francis and Grace. Both games were forced into double overtimes and ended in ties of 1-1 and 3-3 respectively.

After a 1-5 loss to Huntington earlier in the season, the team came back with the home crowd behind them for a 2-1 victory over the Foresters. The victory was the first of the season and provided the momentum the team needed to get past Indiana-Purdue Extension.

A large fall festival crowd was on hand for the final home match against the Fort Wayne extension of the state's largest Universities. With the score tied 3-3, Jody Engle teamed with Ahmet Borrecki and Coach Stoerr for the winning goal and a happy 4-3 ending.

The road season was an unpleasant one as the team dropped all six of its matches. One happy note, however, the team was never shut out.

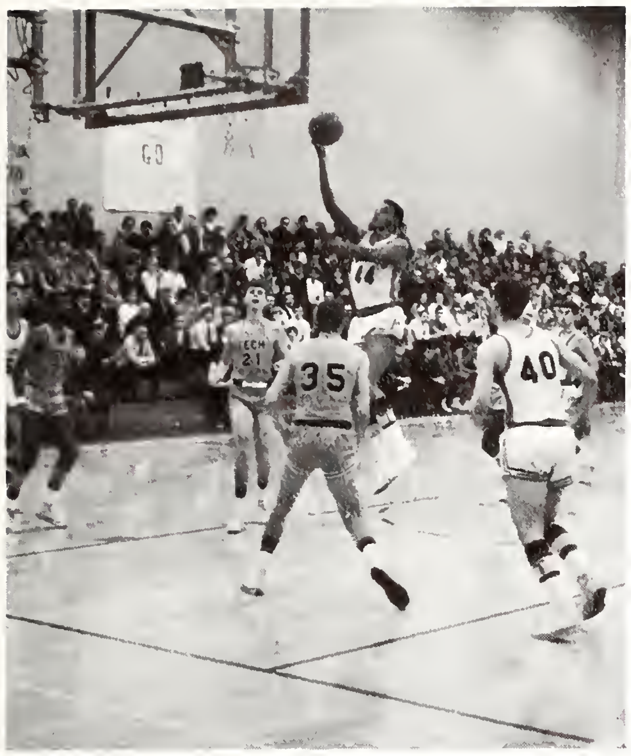
Trojans Retain Mid-Central Conference Title

After a last second shot fell short at Spring Arbor and Goshen slipped past 97-89, the basketball team jelled and it was ever onward. Spring Arbor fell 89-80, and Bethel was driven off the floor to the tune of 95-58. This gave the team a fourth place finish in the Grace Tourney. Goshen finished first.

Indiana Central, last years Indiana's N.A.I.A. Champion felt the sting of a determined TSC team in Indianapolis 85-79. Calvin, 87-83; Northwood, 117-79; St. Francis, 86-65; Capital University, 90-74; Spring Arbor, 107-60; and Hillsdale, 103-85 all fell to the Trojans on the road in the first two weeks of December. The last three were all victims in the Spring Arbor Kiwanis Tourney.

The 67-68 Trojans of Tri-State will long be remembered in the Jackson, Michigan area. In the first game of the Kiwanis Tourney the team turned back much favored Capital University of Columbus, Ohio. The next night they shamed the host team on their own floor 107-60. In the final game, defending champion and favored Hillsdale, could only watch as the smaller Tri-State team tied them in knots and preceded to walk off with all the honors. Tony Rogan led the team to that 103-85 victory and picked up the MOST VALUABLE PLAYER AWARD for his trouble. Junior Ed Schmaltz followed him to the lime light with a spot on the ALL TOURNEY TEAM, and then the whole team stepped forward for the FIRST PLACE TROPHY.

The conference season was tough one but the team was ready and except for a fluke 77-81 setback at Grace, it was smooth sailing. They won nine of the ten conference games and thus won their second straight MID-CENTRAL CONFERENCE CHAMPIONSHIP. With four road games left, the magic 20 wins looked a long way from being a reality, but onward and upwards, three wins and the season ended 20-9. In the District 21 playoffs the team fell to a much taller Hanover 69-81 and thus ended a fine season. Dave Ballinger filling a guard spot won the SPORTSMANSHIP AWARD while Jon Grill collected the FREE THROW SHOOTING AWARD. The only senior, Tony Rogan was voted MOST VALUABLE PLAYER, for his outstanding ability and leadership. Coach Mark Peterman ended his sixth year at Tri-State with a total record of 94 wins against 45 losses. His Mid-Central Conference record was an outstanding 44 victories against only 8 defeats. This season was a fine tribute to a fine coach and outstanding team, and won't be forgotten for many years.



Two for Tony

Dale Waltz Receives N.A.I.A. Honorable Mention

The inability to hit the ball caused Tri-State another below 500 season, as they ran up a 6-7 record. Jim Taylor again dominated the plate scene with a .360 batting average. Allen Abbota finished at .333; Lanny Frisco, .317; Denny DeGroff, .308; and star pitcher Dale Waltz rounded out the .300 club at .307.

Pitching was the big story as six pitchers combined for a 2.93 earn run average. Dale Waltz was the big man hurling 34 innings and allowing only 4 runs for a .54 E.R.A. His mark was the sixth best in the nations small colleges and got him honorable mention in the N.A.I.A. He compiled a 4-1 record in 7 appearances. Dale also received the most valuable player award and was named to the all conference team.

Bob Lockhart and Jerry Rados collected the teams other two wins, as they finished with 1-1, and 1-2, records respectively. All 19 men saw action during the short 13 game season. The team combined for a .256 batting average and .909 fielding average.

New to the coaching staff was Gary Thompson, who assumed coaching duties this season. He was assisted by student coach Mannual Ortiz. A great thanks goes to both of these men for their leadership this past season.

Golfers Capture 2nd Straight NAIA District Title

Seniors—Nigro, Erbe, Harreld

Golf and Tri-State College were feared words in Hoosier Land after the 1968 team won their second straight District 21 title. The team will go down in history as TSC's best.

Captain, John Nigro, led the team and was medalist in the Mid-Central Conference meet. The team finished 16-2 over-all and 10-0 in the conference. The conference title was their 9th straight without a loss.

After winning the second District 21 title they placed 17th in the National N.A.I.A. Tourney at Bemidji, Minnesota. John Nigro finished 21st individually and will assume coaching duties next season. Only Randy Webber will return next season. The team graduated John Nigro, Jack Harreld, and Scott Erbe.

MCC Title for the 9th straight time. L. to R: Erbe, Harreld, Webber, Nigro, Schuster.

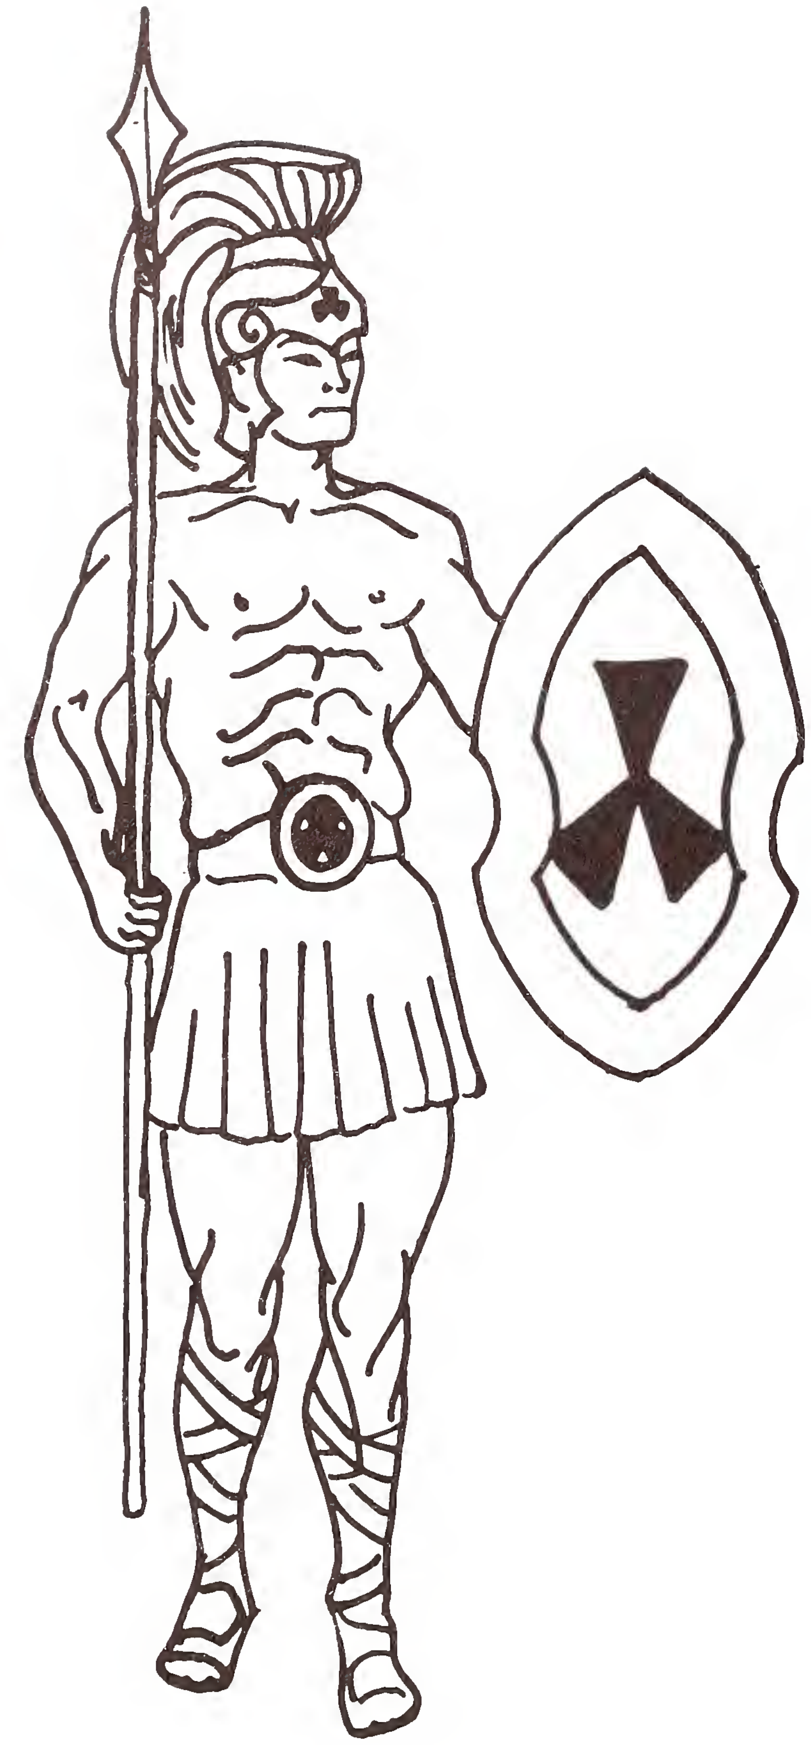
BOB MACAUKEY



In ending the 1968 Modulus, I would like to thank the following people who have worked diligently during the Christmas quarter break to put out this year's book. First of all, I want to thank Dennis Maugherman, Randy Webber, and Steve Neal who laid out the many pages, Marge Neal who not only helped type the copy and cut lines, but also brought cookies when we worked late into the night which was often, very often. I would like to thank Paul Maruszak, our Photographer Editor, in compiling the necessary pictures for the yearbook. Also, I would like to thank Mrs. Marshall for typing some of the pages. In conclusion, I must thank the administration, faculty, and the students who have been so patient while waiting for the yearbook to be published.

Thank You Again,

Don Locke, Executive Producer
